## Gasketed Trunking for External Use

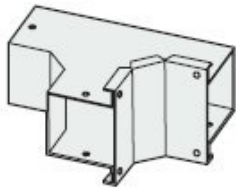

- All sizes shown in our single and multi compartment sections can be manufactured to prevent ingress of dust and liquids
- The system is designed with an outward returned flange on the body with an overlapping lid, which is fitted with a neoprene gasket on both sides along its entire length. When installed the gasket is compressed between body and lid by screws which fix into captive bushes on the outward flanges
- Trunking manufactured to this design will provide IP54 protection and is supplied in maximum lengths of 2 metres
- A complete range of accessories, fully gasketed, is available

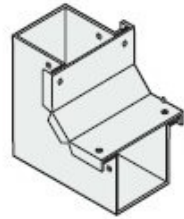

- 1 Neoprene Gasket
- 2 Trunking Lid
- 3 Connector Strap
- 4 Internal Connector
- 5 Trunking Body
- 6 Neoprene Washer
