## Single Compartment Cable Trunking

Flytec offers a comprehensive range of high quality cable trunking and accessories

TR Trunking Length

- All lengths are supplied with internal connectors secured by M5 bright zinc-plated screws fixed into captive nut inserts
- Lids are secured by a two part all steel turnbuckle as standard. Slotted or tamperproof screw lids can also be supplied
- Pre-Galvanised steel to BS EN10142 & 3
- The entire range is available in a polyester powder coated finish
- Accessories are generally a one piece construction complete with internal fitting connector

### Accessories

#### How to order

- For screw fix lid add S after trunking part number
- For tamperproof screw lid add TX after trunking part number
- For powder coated add P after trunking part number (RAL No required at time of enquiry or order)
- For fittings use accessory part number followed by trunking size - example A 50 x 50 flat gusset tee would be FGT 22
